

Poster Sessions for the Online Workshop on Dimensionality Reduction and Inference in High-Dimensional Time Series

All posters will be presented in breakout rooms in Zoom, where all participants are able to freely move from one room to another. To fully enjoy this experience, we recommend to upgrade your Zoom to the latest version.

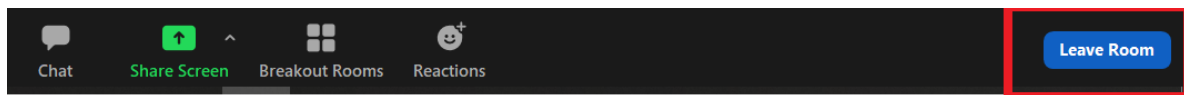

The breakout rooms are accessible by clicking on “Breakout Room” in the menu bar.

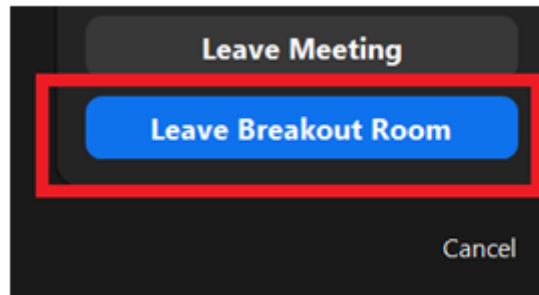

A window will pop up with an overview of the poster presenters in the different rooms. You can choose the poster session you want to attend by clicking on “Join” and by confirming:

If you are in a poster session and you want to leave the session, please click on “Leave Room”

and then choose for “Leave Breakout Room”. This will return you to the main room.

If instead, you want to directly move from one breakout room to another, you can click on “Breakout Room” in the menu bar and join another room in the way explained above.
